ELSEVIER

Bone Vol. 23, No. 6
December 1998:563–568

SUBJECT INDEX
Bone, Volume 23, 1998

Acoustic velocity
Bone mass and elasticity with TGF-β1 Gene, 87
Acute phase reaction
Paget's disease of bone, 543
Adaptation
Loading model for studying mechanically induced bone adaptation, 307
Age-related differences
Vertebral bone density, 283
Alkaline phosphatase
Catecholamines stimulation of activity of MC3T3-E1 osteoblast-like cells, 197
Osteoblast appearance after mechanical loading, 409
Alzheimer's disease
Vitamin D deficiency and reduced bone mass in elderly women with Alzheimer's, 555
Amino acids
Insulin-like growth factor-I production and, 103
Androgens
Versus estrogens, in male skeletal homeostasis, 391
Anesthesia
Isoflurane decreases ionized calcium and increases parathyroid hormone and osteocalcin, 479
Antiestrogen
Tamoxifen and clomiphene in ovariectomized rats, 537
Apoptosis
Caspases (interleukin-1β-converting enzyme family proteases) are involved in the regulation of the survival of osteoclasts, 33
Area code
Osteoclast precursors as leukocytes, 491
Automatic image processing
Comparison of two methods for measuring orientation, 383

Backscattered electrons
Imaging for the measurement of mineral density distribution, human bone biopsies, 319
BALB/c-MC
Osteoclast formation from bone marrow cells, 27
Basic fibroblast growth factor
Growth and expression human bone marrow-derived bone-like cells, 111
Bending strength
Three-point bending test and peripheral quantitative computed tomography, 155
Biomechanics
Bone adaptation to mechanical stimuli, 399
Clodronate treatment on established bone loss in ovariectomized rats, 333
Growth hormone effects on bone formation and resorption, 395
Bisphosphonate administration schedule
Paget's disease of bone, 543
Bisphosphonates
Binding and antiresorptive properties, 437
Paget's disease of bone, 543
Preadministration of incadronate disodium, 459
Withdrawal of parathyroid hormone treatment in old rats, 43
Bone
Biomechanical effects of growth hormone, 395
Caspases and the survival of osteoclasts, 33
Fracture toughness, 67
Insulin receptor expression in osteoclast-like cells, 181
Nitric oxide synthase expression, 1
Parathyroid hormone induces interleukin-6, 327
Stromelysin expression, 7
Withdrawal of parathyroid hormone treatment in old rats, 43
Bone, very dense
Rostrum of toothed whale, ultrastructure, 241
Bone architecture
Human bone biopsies, 59
Bone biomarkers
Oral hormone replacement therapy after ovariectomy, 361
Bone cell
Immunoelectron microscopic localization of cathepsin K in, 499
Bone cell, human
Basic fibroblast growth factor enhances the growth and expression, 111
Bone cultures
Heterocycle-containing bisphosphonate analogs, 437
Bone density
Bone adaptation to mechanical stimuli, 399
Bone formation
Insulin-like growth factor-I production and collagen synthesis, 103
Loading model for studying mechanically induced bone adaptation, 307
Prednisolone in trabecular bone mass and strength, 353
PTH(1–34) suppression, cranial osteoblasts, 453
Bone fragility
Influence of microdamage on fracture toughness of the human femur and tibia, 303
Bone geometry
Comparison of three-point bending test and peripheral quantitative computed tomography, 155
Bone gla-protein
Lymphoblastoid interferon-α in human osteoblastic cells (Saos-2), 205
Bone histomorphometry
Cancellous bone of the iliac crest, 53
Preadministration of incadronate disodium, 459
Bone loss
Allelic variation at the interleukin-1 receptor antagonist gene, 367
Great Britain and Japan: a comparative longitudinal study, 379
Bone markers
Cross-linked N-telopeptides and aminoterminal propeptides of type I collagen, 471
Bone marrow
Basic fibroblast growth factor, 111
Bone marrow cell
Development and trabecular bone dynamics after ovariectomy, 443
Bone mass
Growth hormone increases vertebral and femoral bone strength, aged rats, 343
Bone microdamage
Intracortical remodeling in long bones after fatigue loading, 275
Bone mineral density (BMD)
Comparison of three-point bending test and peripheral quantitative computed tomography, 155
Exercise training and etidronate treatment effects, 147
Fracture toughness, 67
Insulin-like growth factor-I, 13
Oral hormone replacement therapy after ovariectomy, 361
Prediction of vertebral failure loads, 417

8756-3282/98/$19.00
PII 58756-3282(98)00161-6

Bone Vol. 23, No. 6
December 1998:563–568

Prednisolone in trabecular bone mass and strength, 353
Bone modeling
Strain rate as controlling influence on, ulna, 313
Bone morphogenetic protein
Effects on differentiation of cells isolated from human bone, muscle, and skin, 223
Sequential expression of, 127
Bone remodeling
Cytokines, bone remodeling, and estrogen deficiency, 75
Long bones after fatigue loading, 275
Short-term treatment with prednisolone and calcitriol, 297
Bone resorption
Calcitonin responsiveness and receptor expression, 233
Heterocycle-containing bisphosphonate analogs, 437
Bone resorption lacuna
Immunoelectron microscopic localization of cathepsin K, 499
Bone sialoprotein
Lymphoblastoid interferon-α osteoblastic cells (Saos-2), 205
Bone strength
Growth hormone increases vertebral and femoral bone strength, aged rats, 343
Prostaglandin E_2 effects in intact and ovariectomized rats, 249
24R,25-dihydroxyvitamin D_3, 141
Withdrawal of parathyroid hormone treatment in old rats, 43
Bone structure
Two methods for measuring orientation, 383
Bone turnover
After ovariectomy, 443
Bone ultrastructure
Rostrum of a toothed whale, 241
Breast cancer cell line
Osteoclast formation from bone marrow cells, 27

Calcitonin (CT)
Responsiveness and receptor expression in osteoclasts, 233
Calcitonin receptor
Responsiveness and receptor expression in osteoclasts, 233
Calcitriol
Short-term treatment on bone and mineral metabolism in normal men, 297
Calcium
Isoflurane decreases ionized calcium and increases PTH and osteocalcin, 479
Cancellous bone
Effects of severe secondary hyperparathyroidism, rats with chronic renal insufficiency, 257
Quantitative ultrasound measurements and structure independent of density, 425
Three-dimensional confocal images of microdamage, 373
Cancer-induced osteolysis
Osteoclast formation from bone marrow cells, 27
Canine distemper virus
Paget's disease, 171
Carboxyterminal pyridinoline cross-linked telopeptide of type 1 collagen
Prednisolone in trabecular bone mass and strength, 353
Cartilage
Treatment of resting zone chondrocytes with transforming growth factor-β1, 465
Caspase
Survival of osteoclasts, 33
Cathepsin K
Immunoelectron microscopic localization in osteoclasts and other bone cells, 499
Cell culture
Effects of recombinant human bone morphogenetic protein-2, 223
Cell membrane fusion
Cholesterol in osteoclast-like cell formation, 135
Cell-to-cell contact
Osteoclast formation from bone marrow cells, 27
Cholesterol
Osteoclast-like cell formation via cellular fusion, 135
Chondrocytes
Stromelysin expression in developing bone, 7
Treatment with transforming growth factor-β1, 465
Clodronate
Effect established bone loss in ovariectomized rats, 333
Clomiphene
Tamoxifen and, ovariectomized rats, 537
Collagen
Arginine increases insulin-like growth factor-I, 103
Collagen fibril organization
Rostrum of a toothed whale, ultrastructure, 241
Colony forming units (fibroblastic)
Bone marrow cell development and trabecular bone dynamics, 443
Colony forming units (granulocytes and macrophages)
Bone marrow cell development and trabecular bone dynamics, 443
Compressive load
Prednisolone in trabecular bone mass and strength, 353
Confocal microscopy
Three-dimensional images of microdamage in cancellous bone, 373
Cortical bone
Adaptive modeling in response to dynamic loading, ulna, 313
Effects of severe secondary hyperparathyroidism, rats with chronic renal insufficiency, 257
Microdamage on fracture toughness of the human femur and tibia, 303
Cortical density
Comparison of three-point bending test and peripheral quantitative computed tomography, 155
Corticosterone
Osteoprogenitor cell response, 119
Cortisol
Osteoprogenitor cell response, 119
Cortisone
Osteoprogenitor cell response to, 119
CPP32
Caspases in the survival of osteoclasts, 33
Cross-hatch staining
Three-dimensional confocal images of microdamage in cancellous bone, 373
Cyclic AMP
Signal pathways for mitogenesis in bone cells, 17
Cytokines
Allelic variation at the interleukin-1 receptor antagonist gene, 367
Bone remodeling and estrogen deficiency, 75

Densitometry
Dual-energy x-ray absorptiometry and quantitative computed tomography, 283
High turnover bone disease after lung transplantation, 485
Dexamethasone
Basic fibroblast growth factor in human bone marrow-derived bone-like cells, 111
Diffuse staining
Microdamage in cancellous bone, 373
1,25-Dihydroxyvitamin D_3
Treatment of resting zone chondrocytes with transforming growth factor-β1, 465
1α,25-Dihydroxyvitamin D_3
Nonnuclear membrane receptor in the chick tibial fracture-healing callus, 141
24R,25-Dihydroxyvitamin D_3
Nonnuclear membrane receptor in the chick tibial fracture-healing callus, 141
Dual-energy X-ray absorptiometry
Cross-linked N-telopeptides and aminoterminal propeptides of type I collagen, 471

Prediction of vertebral failure loads, 417
Vertebral bone density evaluated by, 283

Elderly women
Cross-linked N-telopeptides and aminoterminal propeptides of type I collagen, 471
Electric coupling
Vitamin D_3, 17β-estradiol, vasoactive intestinal peptide, and glutamate effects, 521
Epinephrine
Proliferation and alkaline phosphatase activity of MC3T3-E1 osteoblast-like cells, 197
Estradiol
Pelvic and proximal tibial cancellous bone response to ovariectomy, 267
Estrogen deficiency
Cytokines, bone remodeling, and, 75
Estrogen replacement therapy
Cross-linked N-telopeptides and aminoterminal propeptides of type I collagen, 471
Estrogens
Androgens *versus*, in male skeletal homeostasis, 391
Tamoxifen and clomiphene in ovariectomized rats, 537
Estrogens, conjugated equine
Effects on bone, after ovariectomy in young adult monkeys, 361
Etidronate
Bone mineral density and trabecular bone in ovariectomized rats, 147
Exercise
Etidronate treatment on bone mineral density and trabecular bone in ovariectomized rats, 147
Exercise therapy
For osteoporosis, 83

Failure load
Vertebral, from spinal and femoral dual-energy x-ray absorptiometry, 417
Fatigue
Intracortical remodeling in long bones after, 275
Fluorescence-activated cell sorter
Bone marrow cell development and trabecular bone dynamics, 443
Fluoride
Isoflurane decreases ionized calcium and increases parathyroid hormone and osteocalcin, 479
Fourier transform infrared microspectroscopy
Bones of osteocalcin-deficient mice, 187
Fractal analysis
Cancellous bone of the iliac crest, 53
Fracture
Influence of microdamage on toughness of the human femur and tibia, 303
Trabecular microarchitecture of human iliac bone, 163
Fracture healing
24R,25-dihydroxyvitamin D_3, 141
Fracture toughness
Microdamage effects, human femur and tibia, 303
Mineral density, porosity, and tensile properties, 67

Gap junctions
Vitamin D_3, 17β-estradiol, vasoactive intestinal peptide, and glutamate, 521
Gender-related differences
Vertebral bone density, 283
Gene expression
Parathyroid hormone induces interleukin-6, murine calvarial organ cultures, 327
Genetics
Allelic variation at the interleukin-1 receptor antagonist gene, 367
Glucocorticoids (GC)
Osteoprogenitor cell response to, 119
Short-term treatment on bone and mineral metabolism in normal men, 297
Grooves
PTH(1–34) suppresses appositional bone formation, 453
Growth factors
Bone mineral density, 13
Growth hormone
Biomechanical effects and bone formation and resorption?, 395
Vertebral and femoral bone strength in osteopenic, ovariectomized, aged rats, 343
Guanosine 5′-triphosphate (GTP) binding protein
Proliferation and alkaline phosphatase activity of MC3T3-E1 osteoblast-like cells, 197

HEM-1
Tumor expression studies, 549
Heme oxygenase
Induction of HO-1 mRNA, levels of mechanical loading in vivo, 433
Hemiplegia
Menatetrenone ameliorates osteopenia, stroke patients, 291
Histologic section
Human bone biopsies, 59
Histomorphometry
Bone mass and bone elasticity lacking TGF-β1 gene, 87
Clodronate treatment on established bone loss in ovariectomized rats, 333
Loading model for studying mechanically induced bone adaptation, 307
Spaceflight and insulin-like growth factor-I on rat long bones, 527
Withdrawal of parathyroid hormone treatment old rats, 43
HMG-CoA reductase inhibitor
Cholesterol in osteoclast-like cell formation via cellular fusion, 135
Hormone replacement therapy
Effects on bone, after ovariectomy in young adult monkeys, 361
Human bone formation
Transforming growth factor-β isoforms and their signaling receptors in growing human bone, 95
Humoral hypercalcemia of malignancy
Osteoclastogenesis inhibitory factor, 495
Hypercalcemia
Osteoclastogenesis inhibitory factor in, 495
Hypophosphatemia
Tumor expression studies of *HEM-1*, 549

IGF-I
Arginine increases production and collagen synthesis in osteoblast-like cells, 103
Iliac crest
Human bone biopsies, 59
Immobilization
Preadministration of incadronate disodium to prevent bone loss, 459
Immunocytochemistry
Insulin receptor expression in osteoclast-like cells, 181
Immunoelectron microscopy
Localization of cathepsin K in osteoclasts and other bone cells, 499
Immunohistochemistry
Nitric oxide synthase expression, 1
Inflammation
Nitric oxide synthase expression, 1
Inositol phosphates
Signal pathways for mitogenesis in bone cells, 17
In situ-reverse transcriptase-polymerase chain reaction
Canine distemper virus in Paget's disease, 171
Insulin
Receptor expression in osteoclast-like cells, 181
Insulin-like growth factor binding protein-3 (IGFBP-3)
Bone mineral density, 13
Insulin-like growth factor-I (IGF-I)
Bone mineral density, 13
Spaceflight and insulin-like growth factor-I on rat long bones, 527
Insulin-like growth factor-II (IGF-II)
Signal pathways for mitogenesis in bone cells, 17

Bone Vol. 23, No. 6
December 1998:563–568

Interferon-α
Lymphoblastoid, parathyroid hormone (PTH)/PTH-related peptide (PTHrP) receptor expression, 205
Interleukin-1α
Caspases in the survival of osteoclasts, 33
Interleukin-6
Parathyroid hormone, RNA expression in murine calvarial organ cultures, 327
Interleukin-1 receptor antagonist
Allelic variation, associated with early postmenopausal bone loss, spine, 367

Knockout mice
Bone mass and elasticity without TGF-β1 gene, 87
Fourier transform infrared microspectroscopic analysis of bones, 187

Leukocytes
Osteoclast precursors as, 491
Light and electron microscopy
Matrix mineralization in MC3T3-E1 cell cultures, 511

MC3T3-E1
Matrix mineralization in MC3T3-E1 cell cultures, β-glycerophosphate pulse, 511
Mechanical loading
Adaptive modeling in response to dynamic loading, ulna, 313
Heme oxygenase isozymes in bone, 433
For studying mechanically induced bone adaptation, 307
Mechanical strain
Adaptive modeling in response to dynamic loading, ulna, 313
Loading model for studying mechanically induced bone adaptation, 307
Mechanical stress
Bone adaptation to mechanical stimuli, 399
Mechanical testing
Spaceflight and insulin-like growth factor-I on rat long bones, 527
Mechanotransduction
Bone adaptation to mechanical stimuli, 399
Medroxyprogesterone acetate
Effects on bone, after ovariectomy in young adult monkeys, 361
Membrane receptor/binding protein
24R,25-dihydroxyvitamin D_3, 141
Menatetrenone
Osteopenia in disuse-affected limbs of stroke patients, 291
Menopause
Cross-linked N-telopeptides and aminoterminal propeptides of type I collagen in, 471
Metalloproteinases
Expression in developing human bone, 7
Microcomputed tomography
Human bone biopsies, 59
Quantitative ultrasound measurements density in human vertebral cancellous bone?, 425
Trabecular microarchitecture of human iliac bone, 163
Microcracks
Three-dimensional confocal images in cancellous bone, 373
Microdamage
Influence on fracture toughness of the human femur and tibia, 303
Three-dimensional confocal images in cancellous bone, 373
Microhardness
Fracture toughness of bone, 67
Spaceflight and insulin-like growth factor-I on rat long bones, 527
Mineral density distribution
Quantitative backscattered electron imaging, human bone biopsies, 319
Mineralization
Basic fibroblast growth factor, 111
Fourier transform infrared microspectroscopic analysis of bones, 187
Heterocycle-containing bisphosphonate analogs, 437
MC3T3-E1 cell cultures initiated by β-glycerophosphate pulse, 511
Modeling
Growth hormone effects on bone formation and resorption, 395
Mouse
Osteoprogenitor cell response to glucocorticoids, 119
Mouse femur
Immunoelectron microscopic localization of cathepsin K in osteoclasts and other bone cells, 499
Murine
Calcitonin responsiveness and receptor expression in osteoclasts, 233
Murine model
Comparison of three-point bending test and peripheral quantitative computed tomography, 155
Muscle
Effects of recombinant human bone morphogenetic protein-2, 223

Neridronate (amino hydroxyhexilidene bisphosphonate)
Paget's disease of bone, 543
Neurotransmitters
Vitamin D_3, 17β-estradiol, vasoactive intestinal peptide, and glutamate on electric coupling, 521
Nitric oxide synthase
Expression in bone cells, 1
Nonhuman primate
Isoflurane decreases ionized calcium and increases parathyroid hormone and osteocalcin, 479

Oncogenic osteomalacia
Tumor expression studies of *HEM-1*, 549
Orientation measuring methods
Comparison of two methods, 383
Osteoblast-like cells
Vitamin D_3, 17β-estradiol, vasoactive intestinal peptide, and glutamate, 521
Osteoblasts
Arginine increases insulin-like growth factor-I, 103
Basic fibroblast growth factor enhances the growth and expression, 111
Biomechanical effects of growth hormone, 395
Catecholamines stimulate the proliferation and alkaline phosphatase activity of, 197
Effects of recombinant human bone morphogenetic protein-2, 223
Exercise training and etidronate effects on bone mineral density, 147
Heme oxygenase isozymes in bone, 433
Lymphoblastoid interferon-α downregulation of PTH, 205
Matrix mineralization initiated by β-glycerophosphate pulse, 511
Nitric oxide synthase expression, 1
Osteoprogenitor cell response to, 119
Parathyroid hormone induces interleukin-6, 327
Phorbol ester-induced production of prostaglandin E_2, 213
PTH(1–34) suppresses appositional bone formation, 453
Signal pathways for mitogenesis, 17
Stromelysin expression in developing bone, 7
Osteocalcin
Fourier transform infrared microspectroscopic analysis, 187
High turnover bone disease after lung transplantation, 485
Insulin-like growth factor-I and bone mineral density, 13
Isoflurane decreases ionized calcium and increases parathyroid hormone, 479
Prednisolone in trabecular bone mass and strength, 353
Short-term treatment with prednisolone and calcitriol, 297
Osteoclast differentiation factor
Hypocalcemic effects, tumors associated with humoral hypercalcemia of malignancy, 495

Osteoclastogenesis inhibitory factor
Hypocalcemic effects in tumors associated with humoral hypercalcemia of malignancy, 495
Osteoclasts
Calcitonin responsiveness and receptor expression, 233
Caspases (interleukin-1β-converting enzyme family proteases) are involved in the regulation of the survival of osteoclasts, 33
Cholesterol in formation via cellular fusion, 135
Exercise training and etidronate effects on bone mineral density, 147
Formation from bone marrow cells, 27
Immunoelectron microscopic localization of cathepsin K in, 499
Insulin receptor expression in, 181
Precursors as leukocytes, 491
Prednisolone in trabecular bone mass and strength, 353
Stromelysin expression in developing bone, 7
Osteocytes
Heme oxygenase isozymes in bone, 433
Intracortical remodeling in long bones after fatigue loading, 275
Osteopenia
Clodronate treatment on established bone loss in ovariectomized rats, 333
Growth hormone increases vertebral and femoral bone strength, aged rats, 343
Menatetrenone amelioration of, stroke patients, 291
Preadministration of incadronate disodium to prevent bone loss, 459
Prostaglandin E_2 increases bone strength in, 249
Response of pelvic and proximal tibial cancellous bone, 267
Serum levels of cross-linked N-telopeptides and aminoterminal propeptides, 471
Tamoxifen and clomiphene in ovariectomized rats, 537
Osteoporosis
Allelic variation at the interleukin-1 receptor antagonist gene, 367
Cancellous bone of the iliac crest, 53
Exercise as therapy for, 83
Great Britain and Japan: a comparative longitudinal study, 379
Insulin-like growth factor-I, 13
Tamoxifen and clomiphene in ovariectomized rats, 537
Trabecular microarchitecture of human iliac bone, 163
Vertebral failure loads from spinal and femoral dual-energy X-ray absorptiometry, 417
Vitamin D deficiency and reduced bone mass in elderly women with Alzheimer's, 555
Osteoprotegerin
Hypocalcemic effects in tumors associated with humoral hypercalcemia of malignancy, 495
Osteotropic hormones
Effects on electric coupling between rat osteoblast-like cells in vitro, 521
Ovariectomy
Bone marrow cell development and trabecular bone dynamics after, 443
Clodronate treatment on established bone loss in ovariectomized rats, 333
Exercise training and etidronate treatment effects on bone mineral density, 147
Growth hormone increases vertebral and femoral bone strength, aged rats, 343
Prostaglandin E_2 increases bone strength, 249
Response of pelvic and proximal tibial cancellous bone, 267

Paget's disease
Canine distemper virus, 171
Neridronate as a first treatment and in relapse after clodronate, 543
Paramyxovirus
Canine distemper virus in Paget's disease, 171
Parathyroid gland
Severe secondary hyperparathyroidism, 257
Parathyroid hormone (PTH)
Appositional bone formation by cultured rat cranial osteoblasts and, 453
High turnover bone disease after lung transplantation, 485
Interleukin-6 heterogeneous nuclear and messenger RNA expression in murine calvarial organ cultures, 327
Isoflurane decreases ionized calcium and increases PTH and osteocalcin, 479
Tumor expression studies of *HEM-1*, 549
Withdrawal of treatment in old rats, 43
Parathyroid hormone (PTH)/PTH-related peptide (PTHrP) receptor
Lymphoblastoid interferon-α downregulation, 205
Periosteum
Osteoblast appearance after mechanical loading, 409
Phorbol ester
Production of prostaglandin E_2 in UMR-106 cells, 213
Phosphaturia
Tumor expression studies of *HEM-1*, 549
Phospholipase D (PLD)
Production of prostaglandin E_2 in UMR-106 cells, 213
Platelet-derived growth factor (PDGF)
Signal pathways for mitogenesis in bone cells, 17
Polymorphism
Allelic variation at the interleukin-1 receptor antagonist gene, 367
Porcine
Calcitonin responsiveness and receptor expression in osteoclasts, 233
Porosity
Fracture toughness of bone, 67
pQCT
Bone mass and elasticity lacking of TGF-β, 87
Preadministration
Incadronate disodium to prevent bone loss, 459
Procollagen
Short-term treatment with prednisolone and calcitriol, 297
Prostaglandin E_2 (PGE_2)
Bone strength in intact rats and ovariectomized rats, 249
Osteoclast formation from bone marrow cells, 27
Phorbol ester-induced production in UMR-106 cells, 213

Quantitative bone histomorphometry
Response of pelvic and proximal tibial cancellous bone to ovariectomy, 267
Quantitative bone morphometry
Human bone biopsies, 59
Quantitative computed tomography
Vertebral bone density evaluated by, 283
Quantitative ultrasound
Measurements, structure independent of density in human vertebral cancellous bone, 425

Rapamycin
Bone mass and bone elasticity lacking the TGF-β1 gene, 87
Rat
Effects of secondary hyperparathyroidism on cancellous and cortical bone, 257
Growth hormone increases vertebral and femoral bone strength, 343
Intracortical remodeling in long bones after fatigue loading, 275
Loading model for studying mechanically induced bone adaptation, 307
Osteoblast appearance after mechanical loading, 409
Osteoprogenitor cell response to glucocorticoids, 119
Strain rate as a controlling influence on adaptive modeling, ulna, 313

Bone Vol. 23, No. 6
December 1998:563–568

Rats, old
Withdrawal of parathyroid hormone treatment, 43
Receptors
Insulin, expression in osteoclast-like cells, 181
Transferring growth factor-β isoforms, in growing human bone, 95
Remodeling
Growth hormone effects on bone formation and resorption?, 395
Renal osteodystrophy
Effects of secondary hyperparathyroidism on cancellous and cortical bone, 257
Resorption
Insulin receptor expression in osteoclast-like cells, 181
Risedronate
Heterocycle-containing bisphosphonate analogs, 437

Secondary hyperparathyroidism (2°HPT)
Effects on cancellous and cortical bone in rats with chronic renal insufficiency, 257
Signal transduction
Phorbol ester-induced production of prostaglandin E_2, 213
Skeletal homeostasis, male
Androgens *versus* estrogens in, 391
Small-angle X-ray scattering
Matrix mineralization in MC3T3-E1 cell cultures, 511
Spaceflight
Histomorphometric, physical, and mechanical effects, 527
Species differences
Osteoprogenitor cell response to glucocorticoids, 119
Spectroscopy, infrared
Fourier transform analysis of bones in osteocalcin-deficient mice, 187
Strain
Osteoblast appearance after mechanical loading, 409
Strain rate
Adaptive modeling in response to dynamic loading, ulna, 313
Stroke
Menatetrenone ameliorates osteopenia in, 291
Stromelysin
Expression in developing human bone, 7
Surface density
Trabecular microarchitecture of human iliac bone, 163

Tamoxifen
Clomiphene and, in ovariectomized rats, 537
Tensile properties
Fracture toughness of bone, 67
Three-dimensional structure
Trabecular microarchitecture of human iliac bone, 163
Three-point bending
Comparison of peripheral quantitative computed tomography, 155
TMS-14
Cholesterol in osteoclast-like cell formation via cellular fusion, 135
Trabecular bone
Cancellous bone of the iliac crest, 53
Human bone biopsies, 59
Quantitative backscattered electron imaging, measurement of mineral density distribution, 319
Trabecular number
Trabecular microarchitecture of human iliac bone, 163
Trabecular structure
Ultrasound measurements, structure independent of density in human vertebral cancellous bone?, 425
Transforming growth factor-β
Decreased bone mass and elasticity in mice, 87
Expression and distribution of isoforms and their signaling receptors, 95
Treatment of resting zone chondrocytes with, 465
Transiliac bone biopsy
Validation of quantitative backscattered electron imaging, 319
Transplantation, lung
High turnover bone disease after, 485
Tumor necrosis factor
Sequential expression of bone morphogenetic protein, 127
Tyrosine kinases
Proliferation and alkaline phosphatase activity of MC3T3-E1 osteoblast-like cells, 197
Signal pathways for mitogenesis in bone cells, 17

Ultrasound
Vertebral failure loads, spinal and femoral, 417

Vertebrae
Bone density evaluated by dual-energy x-ray absorptiometry and quantitative computed tomography, 283
Cancellous bone, ultrasound measurements, 425
Vertebral crush fracture
Cancellous bone of the iliac crest in, 53
Vertebral fracture
Prediction of vertebral failure loads, 417
Vitamin D
Deficiency and reduced bone mass, elderly women with Alzheimer's, 555
High turnover bone disease after lung transplantation, 485
Menatetrenone ameliorates osteopenia in stroke patients, 291
Short-term treatment with prednisolone and calcitriol, 297
Vitamin K
Menatetrenone ameliorates osteopenia in, stroke patients, 291

Whale rostrum
Ultrastructural study of a very dense bone, 241
